Projects

Urban Cipher | https://github.com/abanae/urban-cipher **|**
https://maximosandoval.github.io/urban-cipher/

As a client, you can deepen your lyrical knowledge by using our dictionary functions to look up any "slang" terms from your favorite songs. Or further your 'traditional' knowledge with our Webster dictionary search.

- Crafted responsive client-side interface using Bulma for an intuitive, thoughtful user experience.
- Engineered search section to allow users to search for artist & artist songs.
- Engineered a responsive mobile navigation menu using JavaScript.
- HTML5, CSS, Javascript, Bulma, Fetch API

Really Good Fake Store | https://github.com/abanae/Really-Good-Fake-Store **|**
https://really-good-fake-store.herokuapp.com/

Our project is a mock e-commerce store using seeded data to simulate real products. Users can login/logout & add/delete products from their shopping cart.

- Scrum Master, responsible for solving merging conflicts, assuring everyone was working on
- individual branches & doing pull
- requests.
- Deploying applications on Heroku platform & configuring the host platform.
- Responsible for web design viewports for different layouts
- Created a product route to handle requests to a fake API to render products into our app.
- Handlebars Express, Bootstrap, JavaScript, MySQL, Node.js, Express, Express-Sessions,
- Bcrypt, Mysql2, Sequelize,
- Validator

The Social Petwork | https://github.com/abanae/The-Social-Petwork **|**
https://serene-tundra-79280.herokuapp.com/registerpage

This project is a CRUD social media application. Users can like, create, update and delete posts. Users must be registered & logged in to access the feed page.

- Crafted responsive client-side interface using Material UI
- Initialize connection between front-end & backend by laying out specific routes for conditional renders
- Setting PWA web manifest
- Building an offline experience using service workers
- React, Material UI, Semantic UI, JavaScript, Node.js, Express, Mongoose, Bcrypt, Jsonwebtoken, Apollo-Server-Express, Graphql, Socket-IO
